GEZE mortice locks

Mortice locks for single-leaf doors

GEZE locks are available for metal and wooden doors in combination with standard European profile cylinders. The main lock versions are tested and certified according to EN 12209 to ensure the highest standard on fire and smoke protection doors. The casing of the locks is white galvanized. Their face plates and strike plates are made of stainless steel 304 and visual satin finished and vertically brushed surface. All products are provided with a reversible latch, suitable for left and right-hung doors, and will have a GEZE logo on the top of the faceplate. All dimensions in accordance with DIN 18251.

Area of application

- For single-leaf metal and wooden doors
- For application with standard European profile cylinders and lever handles with 8x8 mm square spindle
- All locks provided with reversible latch, suitable for left and right-hung doors
